

**DANGER**

YOU MAY DIE OR SUSTAIN SERIOUS INJURY IF YOU DO NOT HAVE KNOWLEDGE TO CORRECTLY USE YOUR HELMET AND/OR HAVE NOT READ THIS USER GUIDE.

DO NOT USE YOUR PROTECTIVE HELMET IF YOU HAVE NOT READ AND UNDERSTOOD THIS GUIDE AND THE LABEL ON YOUR HELMET.

THIS HELMET AND ANY OTHER HELMET WILL NOT PROTECT YOU FROM ALL HAZARDS UNDER ALL CONDITIONS.

YOU MUST CORRECTLY ADJUST YOUR HELMET SUCH THAT IT PROPERLY FITS ON YOUR HEAD AND ENSURE THAT IT IS PROPERLY DONNED.

YOU MUST PROPERLY INSPECT, CARE FOR AND MAINTAIN THIS HELMET ACCORDING TO THIS GUIDE IN ORDER FOR THE HELMET TO PROVIDE EFFECTIVE PROTECTION.

*Introduction*

While your helmet is designed to provide head protection, it will not protect you against all exposures and under all conditions, even when worn properly. This user guide provides information and instructions related to the selection, use, care, and maintenance of your helmet.

*Size Selection and Adjustment*

The helmets are provided in different sizes, so take your time to check which one fits best. The helmet shouldn't be so loose to move on your head (as it might obstruct your view), and neither so tight to be uncomfortable.

Put the helmet on your head, close the chinstrap and adjust it. A correct fit is when the helmet sits comfortably, and doesn't move when you move your head up and down, or side to side. If you're not satisfied, try another size.

*Using the Helmet*

In order to correctly use the helmet, you should assure you're using the right size and have the chinstrap attached. Modifications to the helmet will void the warranty and the certification of the product.

*Inspection Details and Frequency*

Inspect your helmet prior to its first use and following every use. Prior to using the helmet for the first time, ensure that the helmet does not have any construction flaws, is completely and properly assembled, or was not damaged.

*Recommended Storage Practice*

Store your helmet only when it is clean and dry. Storing wet helmets will promote growth of mildew, fungus, bacteria, or other harmful substances with the potential to cause skin irritation, rashes, and diseases or illnesses. Wet conditions can also lead to deterioration of helmet textile materials.

Helmets can be damaged by paints and varnishes, petrol, solvents, excessive heat, inappropriate modifications. Store your helmet in a clean, ventilated area away from direct sunlight and away from tools or other sharp objects.

*Care and maintenance*

Shell can be cleaned with a soft tissue and water.

Removable liners can be hand or machine washed separately from the shell, in cold water using mild detergents. Once washed, let the liner dry away from direct sun before putting it back in the helmet. Try the helmet on your head after assembly before first use.

*Replacement After Impact*

Your helmet is made to absorb the energy of a blow by partial destruction or damage to the shell. Even though such damage may not be readily apparent, you should replace your helmet if it is subjected to an impact.

*Lifetime*

It is a good rule to replace a helmet after five years of correct use.

*Warranty*

This helmet is NOT warranted to be fit for a particular purpose. Read carefully the warranty information in this guide.
